BUENA VISTA, Colo. (April 3, 2025) – Hundreds of homes in Buena Vista will soon have access to high-speed fiber internet as Visionary Broadband begins construction this month on a project in this underserved, rural community.

The initiative is funded by a Capital Project Fund (CPF) grant from Advance Colorado and reinforces Visionary’s commitment to overcoming economic and geographic barriers that have long left communities like Buena Vista without reliable options.

Spanning nearly 15 miles from north of Buena Vista to the West of the town, and southward to the community of Nathrop, the multi-month project will connect 1,305 homes with future-proofed fiber infrastructure, ensuring reliable, high-speed access for decades to come.

This expansion strengthens Visionary’s presence in Buena Vista, complementing its existing fiber networks already serving other parts of the community.

“Buena Vista is a thriving community that deserves a strong internet service,” said Brian Worthen, CEO of Visionary Broadband. “We’re proud to bring a brighter digital future to Chaffee County and to ensure folks are not left behind when it comes to broadband.”

Construction will occur throughout 2025. Once complete, residents will have access to cutting-edge broadband – enabling remote work, faster streaming and new opportunities for community growth.

“Reliable internet is essential for the county’s economic growth and long-term sustainability,” said Deborah Cameron, executive director of the Chaffee County Economic Development Corporation. “This fiber expansion will support local businesses and strengthen remote work opportunities.”
