TORRINGTON, Wyo. (Sept. 10, 2025) – Visionary Broadband has completed a brand-new fiber project in Goshen County, which will provide 5-gigabit speed to broadband-starved homes and businesses.

The project, made possible by the Connect Wyoming Capital Projects Fund, begins on the western edge of the City of Torrington and runs about five miles northwest along Highway 26 toward Lingle. In total, it adds 50,874 feet of fiber — nearly 10 miles — to connect 149 homes and businesses with high-speed internet.

The project reflects Visionary’s commitment to bringing future-proof fiber internet to the tough terrain of the American West, constructing a network that only needs to be built once to serve the community for decades to come.

“This project is about more than faster internet. It’s about building the infrastructure that will keep Torrington competitive for the next generation,” said Brian Worthen, CEO of

Visionary Broadband. “Visionary has been proud to invest in Torrington and Goshen County, and this new project deepens that investment.”

Local economic leaders echoed the importance of the project for the future.

“This is exactly the type of infrastructure investment that positions Goshen County for long-term growth,” said Brian Young, CEO of Go Goshen, Goshen County’s official economic development organization. “High-speed, reliable connectivity is essential for attracting new businesses, supporting education and helping our existing employers compete. This project ensures Torrington and the surrounding area have the tools to thrive in today’s economy.”

Service is now available to residents and businesses included in the build.

About Visionary Broadband

Visionary Broadband was founded in 1994 in a rural community in Wyoming. It is a homegrown company that has developed technical abilities with a focus on reliability. Today, the rural internet provider serves five states and has a proven track record of connecting the most rural communities, bringing a commitment of efficiency, reliability, and affordability to its customers.
