

## **Visionary Broadband Teams Up with eero to Launch Wi-Fi 7 Devices on Its Fiber Network**

*Expanded Wi-Fi home coverage available starting in April*

**GILLETTE, Wyo. (Mar. 23, 2026)** — Visionary Broadband, a premier internet provider in the Rocky Mountain Region, will begin offering eero Wi-Fi 7 devices to its fiber internet customers in early April.

Visionary’s fiber internet service with eero Pro 7 is designed for customers with high-bandwidth needs — households where multiple people are streaming 4K content, gaming online, video conferencing, and working from home simultaneously. eero Pro 7 optimizes wifi for wireless speeds up to 3.9 Gbps and wired speeds up to 9.4 Gbps, supporting 200+ connected devices per eero and providing reliable connectivity across every room.

“eero Pro 7 helps our customers experience the full power of their connection throughout their home,” said Brian Worthen, CEO of Visionary Broadband. “Pairing Visionary’s fiber internet service with multiple eero devices working together as a mesh system helps deliver consistent, reliable connectivity throughout the home.”

eero Pro 7 is a tri-band mesh Wi-Fi 7 system which supports internet plans up to 10 Gbps and covers up to 2,000 square feet per eero. Its patented TrueMesh software, combined with TrueRoam and TrueChannel, proactively keeps customers on the optimal and most reliable wifi connection possible.

The addition of eero devices reflects Visionary’s continued focus on pairing high-performance fiber infrastructure with advanced in-home Wi-Fi solutions. Customers will receive up to two eero Pro 7 devices at no additional cost with new installation of Visionary’s fiber internet service.

Smart home ready, the eero Pro 7 works as a smart home hub to easily control Thread, Zigbee, and Matter-enabled devices with Alexa, making it easy to connect everything from smart lights to door locks. And with the eero app, setup takes just minutes, and managing your network — like pausing the internet for dinner or sharing your wifi password with guests — is simple and straightforward.
